

## **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

1. (Currently amended) A control pedal assembly moveable toward and away from a vehicle operator, comprising:

a mounting bracket;

at least one pedal arm;

a pedal carriage to which the pedal arm is pivotally attached;

an extender mechanism connected to the mounting bracket and including:

at least one extender rod having a threaded portion and a portion engaged to a first driven gear, the threaded portion of the extender rod engaging a complementary threaded bore in a bushing attached to the pedal carriage, the extender rod being substantially prevented from lateral movement;

a control rod having a threaded portion and a portion to engage a second driven gear, the threaded portion of the control rod engaging a complementary threaded bore in a bushing directly attached to the pedal arm, the portion engaging the second driven gear being laterally movable through the second driven gear and the end distal the threaded portion actuating a mechanism to be controlled; and

a ~~driving~~ driver gear engaging the first and second driven gears such that, when the ~~driving~~ driver gear is rotated in a first direction by a driving means, the pedal carriage is moved toward the mounting bracket and when the ~~driving~~ driver gear is rotated in a second direction by ~~the~~ the driving means, the pedal carriage is moved away from the mounting bracket.

2. (Original) The control pedal assembly of claim 1 wherein said extender mechanism includes two extender rods and the pedal carriage includes two bushings, each bushing having a threaded bore and engaging a different one of the two extender rods.

3. (Cancelled)
4. (Currently amended) The control pedal assembly of claim 1 wherein the driving means ~~[[is]]~~ includes a DC motor.
5. (Currently amended) The control pedal assembly of claim 1 wherein the driving means ~~gear is~~ includes a cable drive driven by ~~[[a]]~~ the DC motor.
6. (New) The control pedal assembly of claim 1 wherein the bushing directly attached to the pedal arm is rotatably mounted to the pedal arm.
